

## Errata and Maintenance Actions

Date	Section	Prior Language	Modification	Reason
July 29, 2014	Decision 1045	<p>Areas underlain by an identified Sole Source Aquifer are managed as follows:</p> <p>Mineral development is managed as follows:</p> <ul style="list-style-type: none"> <li>• Open to oil and gas leasing subject to NSO stipulations</li> <li>• Open to geophysical exploration</li> <li>• Closed to phosphate leasing</li> <li>• Open to locatable minerals</li> <li>• Closed to mineral materials disposal</li> </ul> <p>ROW management is avoided for major and minor ROWs.</p>	<p>Mineral development in areas underlain by an identified Sole Source Aquifer are managed as follows:</p> <ul style="list-style-type: none"> <li>• Open to oil and gas leasing subject to NSO stipulations</li> <li>• Open to geophysical exploration</li> <li>• Closed to phosphate leasing</li> <li>• Open to locatable minerals</li> <li>• Closed to mineral materials disposal</li> </ul> <p>ROW management is avoided for major and minor ROWs.</p>	Removed duplicative language.
July 29, 2014	NSO Stipulation from Decision 1045 Appendix I	Mineral development in areas underlain by an identified sole source aquifer is managed with Category 3 restrictions (NSO).	Mineral development in Areas underlain by an identified Sole Source Aquifer is managed as follows: Open to oil and gas leasing subject to NSO stipulation.	Decision language quoted in stipulation was from the Proposed Plan and includes language not brought forward to the ROD.
July 29, 2014	Title of Stipulation for Decision 2024 Appendix I	Although written as a CSU stipulation, the title of the stipulation stated it was an NSO.	Title changed from NSO to CSU.	Error corrected.
November 14, 2014	NSO Stipulation from Decision 4031 Appendix I	No surface occupancy or use is allowed within 500 feet of perennial surface waters, riparian-wetland areas, and/or playas (1) as mapped on the Lander Field Office GIS database and (2) to protect perennial surface waters, riparian-wetland areas, and/or playas.	No surface occupancy or use is allowed within 500 feet of perennial surface waters, riparian-wetland areas, and/or playas within Designated Development Areas unless a lesser distance is determined to provide equivalent protection (1) as mapped on the Lander Field Office GIS database and (2) to protect perennial surface waters, riparian-wetland areas, and/or playas.	Stipulation did not include the possibility of a reduced riparian setback in Designated Development Areas.
November 14, 2014	Stipulation from Decision 4045 Appendix I	No surface use or occupancy is allowed within the designated Hudson to Atlantic City area (1) as mapped on the Lander Field Office GIS database and (2) for the protection of wildlife, cultural resources, viewshed, and/or recreational use(s) in the Hudson to Atlantic City area.	The word “designated” is removed. Stipulation now reads: No surface use or occupancy is allowed within the Hudson to Atlantic City area (1) as mapped on the Lander Field Office GIS database and (2) for the protection of wildlife, cultural resources, viewshed, and/or recreational use(s) in the Hudson to Atlantic City area.	The area is not “designated” but is a geographic area with different kinds of management.
November 12, 2014	Stipulation from Decision 4061 Appendix I	Prohibit surface-disturbing and disruptive activities in identified big game parturition areas from May 1 to June 30.	Prohibit surface-disturbing and disruptive activities within identified big game crucial winter range from November 15 to April 30 and with identified big game parturition areas from May 1 to June 30.	Omitted the crucial winter range stipulation in error.

November 12, 2014	Stipulation from Decision 4070 Appendix I	For the protection of wildlife and viewshed, 7,383 acres south of the Green Mountain ACEC is open to oil and gas leasing subject to NSO stipulations; see Map 11).	Tense corrected to plural: For the protection of wildlife and viewshed, 7,383 acres south of the Green Mountain ACEC are open to oil and gas leasing subject to NSO stipulations; see Map 11)	Typographical error.
November 12, 2014	Stipulation from Decision 4070 Appendix I	To protect wildlife parturition areas, viewshed, and recreational use, mineral management of 7,383 acres south of Green Mountain (see Map 11) is open to oil and gas leasing subject to NSO stipulations.	To protect wildlife parturition areas and viewshed, mineral management of 7,383 acres south of Green Mountain (see Map 11) is open to oil and gas leasing subject to NSO stipulations.	Deleted "recreational use" as this is not one of the resource values identified in Decision 4070. References to cultural resources and the State Historic Preservation Officer and other agencies have been removed as not appropriate.
<a href="#">July 13, 2015</a>	<a href="#">Decision 4100</a>	<a href="#">Restore non-functioning riparian systems by repairing abnormally incised drainages to raise water tables and increase water storage and brood-rearing habitats within greater sage-grouse habitat.</a>	<a href="#">Restore non-functioning or functioning at risk riparian systems and repair abnormally incised drainages to raise water tables and increase water storage and improve brood-rearing habitats.</a>	<a href="#">Incorrectly limited restoration to only non-functioning riparian systems with abnormally incised drainages. Improve clarity.</a>
November 12, 2014	Decision 4104	Prohibit surface-disturbing or surface occupancy on or within a 0.6-mile radius of the perimeter of occupied greater sage-grouse leks in Core Area and on or within a 0.25-mile radius of the perimeter of occupied greater sage-grouse leks outside Core Area (Map 24).	Prohibit surface-disturbing activities or surface occupancy on or within a 0.6-mile radius of the perimeter of occupied greater sage-grouse leks in Core Area and on or within a 0.25-mile radius of the perimeter of occupied greater sage-grouse leks outside Core Area (Map 24).	Added the word "activities" which had been omitted in error.
November 12, 2014	NSO Stipulation for Decisions 5034 and 5035 Appendix I		Surface use or occupancy will be restricted within the Castle Gardens site and periphery (1) as mapped on the Lander Field Office GIS database and (2) for the protection of the Castle Gardens cultural site	Improperly identified as CSU.
February 15, 2015	Decision 5050 (NSO for cultural sites)	Add Site 48SW12195 (2552 acres) to the sites protected with NSO	Newly discovered; no existing language.	Newly discovered
March 30, 2015	Stipulation for Decision 5050	Add 48SW12195 (2552 acres) to the stipulation.	Newly discovered; no existing language.	Newly discovered.
11/12/2014	Decision 5066	Prohibit surface-disturbing activities within important scenic areas (VRM Classes I and II). Grant exceptions if it can be demonstrated through a visual simulation and contrast rating worksheet (from all key observation points within the area) that the project or identified mitigation will meet or exceed VRM Class I or II objectives. This restriction does not apply to temporary structures such as drilling rigs.	Prohibit surface-disturbing activities within important scenic areas (VRM Classes I and II). Grant exceptions if the project applicant can demonstrate through a BLM approved visual simulation and contrast rating worksheet (from all key observation points within the area) that the project or identified mitigation will meet or exceed VRM Class I or II objectives. This restriction does not apply to temporary structures such as drilling rigs	Clarified that the proponent bears the responsibility for the visual resources and contrast rating worksheet.
February 15, 2015	Decision 7011	Unless otherwise stated, apply restrictions (site-specific relocation) on developed and future recreation sites and to mapped and future	Unless otherwise stated, apply restrictions (site-specific relocation of <i>surface disturbing activities</i> ) on developed and future recreation sites	Clarify meaning

		national trails, trailheads, and interpretive sites with exceptional recreation values or significant public interest.	and to mapped and future national trails, trailheads, and interpretive sites with exceptional recreation values or significant public interest.	
<u>July 9, 2015</u>	<u>Decision 7018</u>	<u>Sweetwater Mining District</u>	<u>Sweetwater Historic Mining District</u>	<u>Omitted proper name for RMZ</u>
November 12, 2014	Stipulation for Decisions 7059, 7068, 7095, 7106, 7117, 7126 Appendix I	Removed 7079 reference	Decision 7079 closes the ACEC to oil and gas leasing so should not have been listed under the stipulation which is for NSO.	Incorrect reference.
3/24/2014	Decision 4047	Beaver Creek Triangle		
<u>7/13/15</u>	<u>Appendix E</u>	<u>Some of these practices are incorporated as being universally appropriate. The ones that could be analyzed on a planning area-wide basis are identified in the this appendix as Required Design Features.</u>	<u>Some of these practices are incorporated as being universally appropriate. The ones that could be analyzed on a planning area-wide basis are identified in the Decisions and in this appendix as Required Design Features.</u>	<u>Clarified that there are Required Design Features in the Decisions as well as in Appendix #.</u>
<u>7/13/15</u>	<u>Appendix E</u>	<u>Work with the Wyoming Department of Environmental Quality to limit surface discharge of water that has the potential of increasing productivity for mosquitoes and decreasing greater sage-grouse habitat quality</u>	<u>Work with the Wyoming Department of Environmental Quality to limit surface discharge of water that has the potential of contributing to an increase in mosquito populations and decreasing greater sage-grouse habitat quality</u>	<u>Clarified what "productivity" means.</u>
<u>7/13/15</u>	<u>Appendix E</u>	<u>Identify permanent ponds so as to reduce the number of newly flooded sites, which have high productivity for mosquitoes. Avoid flooding flat terrain or low-lying areas.</u>	<u>Identify permanent ponds so as to reduce the number of newly flooded sites, which can increase mosquito population. Avoid flooding flat terrain or low-lying areas.</u>	<u>Clarified what "productivity" means.</u>
7/9/15	Appendix E	Designate a qualified biologist who will be responsible for overseeing compliance with all design features related to the protection of ecological resources throughout all project phases, particularly in areas requiring avoidance or containing concentrated greater sage-grouse populations. This person shall be approved by the BLM.	Designate a qualified wildlife biologist who will be responsible for overseeing compliance with all design features related to the protection of ecological resources throughout all project phases, particularly in areas requiring avoidance or containing concentrated greater sage-grouse populations. This person shall be approved by the BLM.	Add the word "wildlife" to clarify requirements.
